What are wind energy ordinances?

Ordinances regulate aspects of wind projects such as their location, permitting process, and construction and provide clarity to wind developers and the public. WINDEXchange compiled this database of wind energy ordinances from around the country. Wind Energy and Eagles: The Problem, the Permit, and the Path Forward: A WINDEXchange Webinar.

How does a wind energy developer decide on a regulatory structure?

Long before a wind energy developer begins generating the first megawatt of power, the developer must decide on a regulatory structure for the project and negotiate and execute transmission and interconnection agreements. This chapter presents a general discussion of these issues.

Can energy storage enhance solar PV energy penetration in microgrids?

Amirthalakshmi et al. propose a novel approach to enhance solar PV energy penetration in microgrids through energy storage system. Their approach involves integrating USC to effectively store and manage energy from the PV system.

Can BT and hydrogen vehicle storage be integrated in zero-energy buildings?

Explored the integration of BT and hydrogen vehicle storage in zero-energy buildings for hybrid renewable energy applications. Assessed the integration of hybrid energy storage systems on wind generators to enhance grid safety and stability using levelized cost of electricity analysis.
