What products use lithium batteries?

Some consumer products that use these types of batteries include: Automated external defibrillators (AEDs). These devices all contain batteries that are classified as dangerous goods and there are good reasons for this. Here are a few reasons why it's important that your shipments comply with lithium battery shipping regulations:

Should you label a shipment with lithium batteries?

Label the shipment to make it obvious that it contains lithium batteries or dangerous goods. If your eCommerce business requires you to ship consumer goods or products with lithium batteries installed, you should know that you'll have to jump through a number of hoops before you can get your goods to your customers.

What are the requirements for shipping lithium batteries?

If you're planning on shipping lithium batteries, there are certain regulations and requirements you'll have to follow. Some of these include: Lithium Metal Batteries These are batteries that use lithium as an anode. They have a long life and can produce anywhere between 1.5V-3.7V.

Does your retail business use lithium batteries?

If your retail business involves the distribution of products like laptops, tablets, mobile phones, medical devices, or other items that use lithium batteries, it's important that you ensure your shipments adhere to shipping lithium batteries regulations.

This guide provides step-by-step instructions on how to install your R-BOX-OC outdoor solar battery cabinet, including site selection, assembly, wiring, and system testing. [pdf]
